Professional Summary

High-achieving Computer Science student (3.96/4.00 CGPA) with a foundational background in medical training (MBBS coursework), specializing in Python programming, data analytics, and educational leadership. Demonstrates a proven track record of academic excellence, including a Nation-Wide 1st Position honors designation. Offers a unique combination of technical logic and strong human-centric skills developed through direct patient clinical history-taking and academic lecturing. Target-oriented and exceptionally positioned for remote AI data annotation and research-driven internships at the intersection of healthcare, global development, and machine learning.

Core Competencies

- **Technical Skills:** Python, C++, C#, XAML, SQL, Relational Database Management Systems (RDBMS)
- **Data Science Tools:** MS Excel, NumPy, Pandas, Matplotlib, Streamlit, Git Workflow
- **Frontend Technologies:** HTML5, CSS3
- **AI Training Aptitude:** Text Evaluation, Quality Assurance, Syntax Verification, Prompt Analysis
- **Clinical & Soft Skills:** Medical History-Taking, Patient Relations, Clear Communication, Cross-Functional Collaboration

Professional Experience

Computer Science Lecturer (HSSC)

Nusrat Jahan College | *Chenab Nagar, Pakistan* | **January 2026 – Present**

- **Instructional Delivery:** Develop and execute structured lesson plans in Computer Science for HSSC cohorts, translating complex programming concepts and computational logic into accessible training modules.
- **Quality Assessment:** Evaluate, review, and grade assignments and examinations, maintaining a rigorous standard for syntax accuracy, logical flow, and structural optimization.
- **Technical Mentorship:** Guide students through foundational coding laboratories, troubleshooting syntax errors and reinforcing robust programming habits.

Clinical Medical Volunteer

Humanity First | *Pakistan* | 2023, 2021

- **Clinical History-Taking:** Interviewed hundreds of patients across two regional health camps, carefully capturing and detailing present illnesses, chronic conditions, and complex medical histories.
- **Patient Engagement:** Established immediate rapport with diverse patients and family units, ensuring a comfortable environment for accurate self-reporting and symptoms disclosure.
- **Vitals Documentation:** Measured, monitored, and precisely documented baseline patient vital signs, delivering accurate initial indicators to the attending medical teams.
- **Communication Facilitation:** Served as a key liaison between patients and healthcare professionals, translating complex treatment pathways into clear, actionable advice.

Education

Virtual University of Pakistan

- **Bachelor of Science in Computer Science (BSCS)** | *In Progress (final year starting in September-October 2026)*
- **Academic Standing: CGPA 3.96 / 4.00**

University of Health Sciences | *Lahore, Pakistan*

- **Bachelor of Medicine, Bachelor of Surgery (MBBS Coursework)** | *Concluded 2023*
- **Strategic Trajectory:** Completed foundational medical training and pathology coursework before advancing into Computer Science to pioneer data-driven solutions in Computational Medicine and algorithmic health
- **Nusrat Jahan College** | *Chenab Nagar, Pakistan*
- **Higher Secondary School Certificate (HSSC) - AKUEB**
Academic Honors: Nation-Wide 1st Position (Score: 92.5%) | Distinction in Chemistry
- **Secondary School Certificate (SSC) - AKUEB**
Academic Honors: Nation-Wide 3rd Position (Score: 92.5%) | Distinction in Biology, Physics

Credentials & Certifications

- **Coursera Verified Technical Portfolio** – [Django](#), [Front-end](#), [Research](#), [Python Programming](#), [Pandas](#) | [Matplotlib](#) | [Streamlit](#)
- **Cisco Networking Academy Credentials** – [Data science](#), [Networking](#), [cybersecurity](#)
